A PRIORI KNOWLEDGE AND ANALYTIC TRUTH

CreateSpace Independent Publishing Platform. Paperback. Condition: New. This item is printed on demand. 416 pages. Dimensions: 9.0in. x 6.0in. x 0.9in.This book answers three questions: (i) What is it for a statement to be analytically true (ii) What is a priori knowledge (How does it differ from inherited empirical knowledge And how does it differ from acquired conceptual (non-empirical) knowledge, such as ones knowledge that not all continuous functions are differentiable). (iii) Do we have a priori knowledge It is shown that content-externalism is an epistemologicization of the (logically, not psychologically) innocuous fact that, if a sentence S of natural language expresses a multiply quantified generalization, S also expresses each quantified generalization obtained by permuting the quantifiers in it. It is also shown that, through judicious usage of Kaplans dthat-operator, the shred of truth in content externalism can be reconciled with the datum that, in virtue of having a given representational content R, a mental state M has causal powers that it would not otherwise have. And it is thereby shown how to reconcile content-externalism, so far as the latter is true, with the legitimacy of individualist approaches to psychology. Finally, it is shown that content-externalism embodies a crude and false conception of the nature of the relationship between the literal meanings of linguistic expressions, on the one hand, and, on the other hand, the contents of the thoughts underlying our usage of such expressions. More precisely, content-externalism presupposes that literal meaning and cognitive content are in lockstep with each other; which, it is shown, is not the case and---what is also shown---only appears to be the case because of a failure on the part of semanticists to know where to draw the line between semantics and pragmatics. This item ships from La Vergne,TN. Paperback.
