Brand New Book \*\*\*\*\* Print on Demand \*\*\*\*\*.Excerpt from A Practical System for the Use of Alcohol in Diesel Engines: Final Report The search for alternatives to petroleum based fuels is not new nor is it confined to particular countries or cultures. Typically it has been based on need due to war or appliances which resulted in uncontrollable restrictions on fuel delivers. More recently, however, it has been recognized that long-term energy requirements will need to be based on additional sources for chemically stored heat energy to drive the various types of heat engines of modern society. Transportation in particular has special needs due to the twin requirements of relatively high energy density and energy per unit volume. With transportation consuming approximately 25 percent of all energy used in the United States and almost 60 percent of that produced from oil, this sector is strongly dependent on guarantees for reliable future sources of liquid fuel.
