CORONARY CIRCULATION

Condition: New. Publisher/Verlag: Springer, Berlin | Basic Mechanism and Clinical Relevance | Coronary heart disease is one of the major health problems in industrialized nations because of its high incidence and severity. Recent innovations in medical and surgical treatment of coronary heart disease have increased the importance of accurate diagnostic methods for determining the severity of coronary disease, identifying potential treatment alternatives, and evaluating the results of treatment. Great advances have also been made in basic research on coronary circulation and its interaction with myocardial contraction and relaxation and neural and humoral control. With respect to these developments, the papers included in the present monograph deal with important topics concerned with the basic mechanism of coronary circulation as well as ones of clinical relevance. It is directed toward physicians (cardiologists, cardiac surgeons, cardiac radiologists, anesthesiologists, and others) and basic scientists (e.g., physiologists, bioengineers). We would like to emphasize the importance of a multidisciplinary approach in which basic scientists and clinicians work closely together. This volume consists of nine chapters. Chapter 1 contains macroscopic and microscopic descriptions of coronary vascular anatomy, which is closely related to the functions of coronary circulation. In Chap. 2 two methods in current use to evaluate phasic coronary blood velocity waveforms are presented, i.e., the laser Doppler and ultrasound Doppler methods. Chapter 3 describes the mechanical properties of coronary circulation, a knowledge of which is indispensable for an understanding of coronary arterial and venous blood flow velocity waveforms in relation to cardiac contraction and relaxation. | 1. Anatomy of Coronary Circulation.- Anatomical Principles of the Coronary Circulation.- Flow Strategy and Functional Design of the Coronary Network.- 2. Measurements of Epicardial Coronary Artery and Vein Flow Velocity Waveforms on Left and Right Ventricles.- Evaluation of Coronary Blood Flow by Fiber-Optic Laser...
